LAS COLINAS
RESIDENTIAL

welcome to a world apart

Las Colinas Golf & Country Club is situated on the Mediterranean coast, south of Alicante.

A unique, natural enclave, carefully respected and preserved, is the ideal place for well-being and for enjoying a Mediterranean lifestyle, where exclusive homes blend harmoniously into their natural surroundings. A place where you'll feel a world away.

The luxury of living in nature's midst, while having access to high-end sports and leisure facilities, along with privacy, quality and customer service, make Las Colinas Golf & Country Club a place where life takes on a whole new meaning.

Unique experience on arrival

The canyon entrance, winding its way through hills flanked by palm trees, reveals, at the end of the route, a beautiful valley through which the golf course runs. This canyon also shelters Las Colinas from the outside world, preserving its tranquillity, privacy and natural beauty.

Natural areas with Mediterranean vegetation

More than 200,000 m² of natural spaces and landscape paths, with native Mediterranean vegetation, have been preserved.

Maximum privacy and security

Las Colinas Golf & Country Club occupies a 330 hectare valley set among hills that form a natural barrier, safeguarding the privacy of the complex and its residential community. It has a single entry point and a 24-hour security service.

An island surrounded by a natural park of Mediterranean forest

Las Colinas enjoys an exceptional location, surrounded by more than 10,000 hectares of natural park and Mediterranean forest where no other residential developments are permitted.

Exquisite quality sports and leisure facilities

In addition to the golf course, Las Colinas Golf & Country Club offers a complete range of sports, leisure, accommodation and restaurant facilities, including WOW Beach right on the waterfront.

An exceptional climate

Las Colinas Golf & Country Club enjoys over 300 days of sunshine a year, mild winters and pleasant summer temperatures.

A world apart *environmentally friendly*

Las Colinas Golf & Country Club is aware of its responsibility in the current climate and environmental context, which requires the maximum use of resources. Following this premise, it has achieved major milestones, which most notably include:

- The use of recycled water for irrigation of the golf course and communal areas.
- Intelligent centralised irrigation control.
- The removal of plastic elements.
- Cleaning of all facilities with ECO-labelled products.
- 100% electric golf course buggy fleet.

In addition, hundreds of animal and plant species coexist in its facilities, which are protected thanks to a landscaping and conservation plan and the creation of scenic paths that ensure not only the development of these biodiverse communities, but also the enjoyment of those who want to be in contact with nature.

Since its inception, Las Colinas has applied a comprehensive Sustainable Development and Environmental Protection Measures Plan prepared by the Polytechnic University of Valencia.

A world apart to enjoy the cuisine

Las Colinas Golf & Country Club has three restaurants with a diverse range of cuisine: umawa, that fuses Japanese, Mexican and Nikkei cuisine; il Palco, with a culinary service based on traditional Italian cuisine, and unik, which, along with an international cuisine, combines with a Mediterranean touch.

In addition, just a few minutes from Las Colinas Golf & Country Club, on the beachfront of La Glea, you will find WOW Beach where you can enjoy the sunshine, sand and sea.

A world apart to play golf

The Las Colinas golf course stands out for its exclusive and unique design. Designed by the American landscape architect Cabell B. Robinson, creator of internationally renowned courses.

It has been recognized as the “Best Golf Course in Spain” on five occasions, according to the prestigious World Golf Awards and is one of the 100 best golf courses in continental Europe according to Golf World magazine.

In addition to its 18 championship par 71 holes, there is a short game area designed by European Tour winner Miguel Angel Jimenez, a natural grass practice area and a large putting green.

The commitment to innovation has led Las Colinas Golf & Country Club to incorporate Toptracer technology, taking the practice of golf to new level of excitement and fun.

A world apart in access and communications

Las Colinas Golf & Country Club is located in the south of the province of Alicante, just 4.5 km from the coast as the crow flies. It enjoys excellent communications by air, road and rail.

find out
the meaning
of MIMOSA

Mimosa stands for elegance and purity. That is why this plant is in harmony with the essence of the Mediterranean style that encompasses Las Colinas. Travelling to an idyllic villa in the Mimosa Community is possible, a place that brings together all the values to make your home to make your home unequalled. Villas with fine lines, pure and white, dreamlike views and nature that embraces you. That is the true meaning of Mimosa meaning of Mimosa, your home.

Villa Halcón

Mediterranean style essence

The design of the exclusive Villa Halcón, already built and ready to move into, has been carefully conceived to capture the essence of the Mediterranean lifestyle, offering the highest standards of quality and comfort.

This exclusive, newly built, south-east facing villa is surrounded by a Mediterranean wooded landscape that allows the villa to be enjoyed in a private and intimate setting.

Its rooms are distributed over two different heights, with panoramic views of the golf course and the sea.

The Halcón villa has a large land plot of 1,185m², with 242m² of constructed surface area, a solarium and a private swimming pool of 48 m². It has 4 bedrooms, each with en-suite bathrooms and a fully fitted, open-plan kitchen, laundry room and two parking spaces.

It is distinguished by its modern, elegant architectural style and the volumetric composition of its living room and sloping ceiling, enabling you to maximise the spaciousness of the rooms.

Sustainability and environment

The Villa Halcón villas adopt targeted measures to create environmentally sustainable housing that promotes the well-being of the occupants.

Water

Reduction of drinking water consumption in all uses of the building through:

- Flow control in fittings.
- Efficient single-lever mixer taps.
- Dual-flush toilets.
- Drip irrigation in gardens.
- Use of indigenous plants in gardens.

Energy

Minimisation of energy consumption in the building through:

- Energy Efficiency Certificate (EEC): AA.
- LED lighting.
- High efficiency appliances.
- Installation of photovoltaic panels.
- Aerothermal energy for domestic hot water (DHW).
- Ventilation system with heat recovery.
- Smart system for lighting and blinds.

Comfort

- Thermal insulation.
- Sound insulation.
- Optimisation of indoor air quality through a ventilation system that brings in clean air from outside and expels stale air from inside.
- Hinged windows in the living room, dining room, kitchen and bedrooms.

Waste

- Appropriate waste management during construction and transport of waste to authorised landfill sites for recycling.
- Reuse of excavated earth for land reclamation.

Materials

- Use of recycled or recyclable materials in the thermal insulation of the façade and roof.
- Use of local materials (natural stone).

Quality reports

Structure

Reinforced concrete, in compliance with the resistance and durability standards established in the Structural Code and other regulations in force.

Façade and partitions

- External enclosures, built with hollow ceramic bricks and including thermal-acoustic insulation chamber.
